Container 1: 48' Flatbed

Load complies with 49 CFR segregation requirements unless comments or stowage requirements state otherwise

Labels & Marks

© 2025 Crowley Maritime Corporation

- A poison inhalation placard is not required on a freight container or transport vehicle showing this poison gas placard – see §172.504(f)(8)
- Inhalation hazard placards are not valid for use outside North America. When transported within North America under IMDG Code regulations, an IMDG class 2.3 or 6.1 placard is accepted in place of a Poison Inhalation Hazard placard, as appropriate - see 49 CFR §171.23(b)(10)(iv)
- Note: there are additional marking requirements that may be applicable – see 49 CFR §172.313(c) for further information.
- For placarding and marking of cargo transport units see §172.500 and §172.300 of 49 CFR.

Stowage requirements

- On deck only.
- Stow 'clear of living quarters'.
- Stow 'separated from' acetylene.
- Stow 'separated from' ammonia.
- Stow 'separated from' diborane.
- Stow 'separated from' hydrogen.
- Segregation same as for oxidizers.
- Stow 'separated from' radioactive materials.
